SUBJECT INDEX

Atmospheric pressure ionization
The design and performance of an ion trap storage–reflectron time-of-flight mass spectrometer 149

Background reduction
Pulse amplitude analysis: a new dimension in single ion time-of-flight mass spectrometry 181
Biomolecules
Design considerations in energy resolved time-of-flight mass spectrometry 67
Factors affecting the resolution in matrix-assisted laser desorption–ionization mass spectrometry 345

^{252}Cf-plasma desorption mass spectrometry
Pulse amplitude analysis: a new dimension in single ion time-of-flight mass spectrometry 181
Charge transfer resonance
Decay energetics of molecular clusters studied by multi-photon mass spectrometry and pulsed field threshold ionization 211
Cluster ions
Kinetic energy analysis in time of flight mass spectrometry: application of time-of-flight methods to clusters and pyrolysis studies in supersonic expansions 295
Clusters
Decay energetics of molecular clusters studied by multi-photon mass spectrometry and pulsed field threshold ionization 211
Using reflectron time-of-flight mass spectrometer techniques to investigate cluster dynamics and bonding 233
Collisionally-activated dissociation
Sequencing of peptides in a time-of-flight mass spectrometer: evaluation of post-source decay following matrix-assisted laser desorption–ionisation (MALDI) 355

Direct laser desorption–ionization
High-resolution mass spectrometry in a linear time-of-flight mass spectrometer 139
DNA
Time of flight mass spectrometry of DNA laser-ablated from frozen aqueous solutions: applications to the Human Genome Project 335

Double focussing mass spectrometer
Design considerations in energy resolved time-of-flight mass spectrometry 67

Electron impact ionization
Photoemission electron impact ionization in time-of-flight mass spectrometry: an examination of experimental consequences 125
Electrospray ionization
The design and performance of an ion trap storage–reflectron time-of-flight mass spectrometer 149
Electrostatic lenses
Design considerations in energy resolved time-of-flight mass spectrometry 67
Energy resolved time of flight
Design considerations in energy resolved time-of-flight mass spectrometry 67
Energy-isochronous time of flight
Energy-isochronous time-of-flight mass analyzers 387

Hydrogen bonding
Using reflectron time-of-flight mass spectrometer techniques to investigate cluster dynamics and bonding 233

Intramolecular clocking
The one dimensional photofragment translational spectroscopic technique: intramolecular clocking of energy redistribution for molecules falling apart 265
Ion mirror
The application of ion optics in time-of-flight mass spectrometry 43
Ion/molecule complexes
Photodissociation of magnesium ion/molecule complexes in a reflectron time-of-flight mass spectrometer 307
Ion optical calculations
Energy-isochronous time-of-flight mass analyzers 387
Ion optical system
How to specify the ion optical system of a time-of-flight mass spectrometer 21
Ion optics
The application of ion optics in time-of-flight mass spectrometry 43
Ion spectroscopy
Photodissociation of magnesium ion/molecule com-

plexes in a reflectron time-of-flight mass spectrometer 307
Ion trap storage
The design and performance of an ion trap storage–reflectron time-of-flight mass spectrometer 149

Kinetic energy release
Quantitative determination of kinetic energy releases from metastable decompositions of sputtered organic ions using a time-of-flight mass spectrometer with a single-stage ion mirror 283

Laser ablation
Time of flight mass spectrometry of DNA laser-ablated from frozen aqueous solutions: applications to the Human Genome Project 335
Laser assisted reflectron
Laser assisted reflectron time-of-flight mass spectrometry 1
Laser desorption–ionization
Laser ion sources for time-of-flight mass spectrometry 87
Laser ionization
Photoemission electron impact ionization in time-of-flight mass spectrometry: an examination of experimental consequences 125
Linear time of flight
Laser ion sources for time-of-flight mass spectrometry 87

Magnesium complexes
Photodissociation of magnesium ion/molecule complexes in a reflectron time-of-flight mass spectrometer 307
Mass analyzed threshold ionization spectroscopy
Mass analyzed threshold ionization: structural information for a mass spectrum and mass information for ionic spectroscopy 193
Mass calibration
High-resolution mass spectrometry in a linear time-of-flight mass spectrometer 139
Mass resolution
Factors affecting the resolution in matrix-assisted laser desorption–ionization mass spectrometry 345
Mass spectra
Mass analyzed threshold ionization: structural information for a mass spectrum and mass information for ionic spectroscopy 193
Matrix assisted laser desorption–ionization
Design consideration in energy resolved time-of-flight mass spectrometry 67
Factors affecting the resolution in matrix-assisted laser desorption–ionization mass spectrometry 345
High-resolution mass spectrometry in a linear time-of-flight mass spectrometer 139
Sequencing of peptides in a time-of-flight mass spectrometer: evaluation of post-source decay following matrix-assisted laser desorption–ionisation (MALDI) 355
Microchannel plate
Pulse amplitude analysis: a new dimension in single ion time-of-flight mass spectrometry 181
Multiphoton dissociation–ionization
The one dimensional photofragment translational spectroscopic technique: intramolecular clocking of energy redistribution for molecules falling apart 265
Multiphoton ionization
Decay energetics of molecular clusters studied by multiphoton mass spectrometry and pulsed field threshold ionization 211

One dimensional photofragment translational spectroscopy
The one dimensional photofragment translational spectroscopic technique: intramolecular clocking of energy redistribution for molecules falling apart 265
Optical spectra
Mass analyzed threshold ionization: structural information for a mass spectrum and mass information for ionic spectroscopy 193

Penning ionization
Using reflectron time-of-flight mass spectrometer techniques to investigate cluster dynamics and bonding 233
Peptides
Sequencing of peptides in a time-of-flight mass spectrometer: evaluation of post-source decay following matrix-assisted laser desorption–ionisation (MALDI) 355
Perfluorinated polyethers
Resonance-enhanced two-photon ionization time-of-flight spectroscopy of cold perfluorinated polyethers and their external and internal van der Waals dimers 319
Photochemistry
Photodissociation of magnesium ion/molecule complexes in a reflectron time-of-flight mass spectrometer 307
Photoemission electron impact ionization
Photoemission electron impact ionization in time-of-flight mass spectrometry: an examination of experimental consequences 125
Photofragmentation
Laser ion sources for time-of-flight mass spectrometry 87

Postsource decay
Sequencing of peptides in a time-of-flight mass spectrometer: evaluation of postsource decay following matrix-assisted laser desorption–ionisation (MALDI) 355
Pulse amplitude analysis
Pulse amplitude analysis: a new dimension in single ion time-of-flight mass spectrometry 181
Pulse-laser ion sources
Laser assisted reflectron time-of-flight mass spectrometry 1
Pulsed field ionization
Decay energetics of molecular clusters studied by multiphoton mass spectrometry and pulsed field threshold ionization 211

Reflector-type geometries
Energy-isochronous time-of-flight mass analyzers 387
Reflectron
Decay energetics of molecular clusters studied by multiphoton mass spectrometry and pulsed field threshold ionization 211
Laser ion sources for time-of-flight mass spectrometry 87
Mass analyzed threshold ionization: structural information for a mass spectrum and mass information for ionic spectroscopy 193
Sequencing of peptides in a time-of-flight mass spectrometer: evaluation of post-source decay following matrix-assisted laser desorption–ionisation (MALDI) 355
The application of ion optics in time-of-flight mass spectrometry 43
The design and performance of an ion trap storage–reflectron time-of-flight mass spectrometer 149
Using reflectron time-of-flight mass spectrometer techniques to investigate cluster dynamics and bonding 233
Reflectron time of flight mass spectrometer
Photodissociation of magnesium ion/molecule complexes in a reflectron time-of-flight mass spectrometer 307
Resolution
High-resolution mass spectrometry in a linear time-of-flight mass spectrometer 139
Resolution enhanced time of flight
High-resolution mass spectrometry in a linear time-of-flight mass spectrometer 139
Resonance enhanced laser ionization
Laser ion sources for time-of-flight mass spectrometry 87
Resonance enhanced multiphoton ionization
The design and performance of an ion trap storage–reflectron time-of-flight mass spectrometer 149
Resonance enhanced two-photon ionization
Resonance-enhanced two-photon ionization time-of-flight spectroscopy of cold perfluorinated polyethers and their external and internal van der Waals dimers 319
Rydberg states
Mass analyzed threshold ionization: structural information for a mass spectrum and mass information for ionic spectroscopy 193

Sequencing
Time of flight mass spectrometry of DNA laser-ablated from frozen aqueous solutions: applications to the Human Genome Project 335
Single-stage ion mirror
Quantitative determination of kinetic energy releases from metastable decompositions of sputtered organic ions using a time-of-flight mass spectrometer with a single-stage ion mirror 283
Sputtered organic ions
Quantitative determination of kinetic energy releases from metastable decompositions of sputtered organic ions using a time-of-flight mass spectrometer with a single-stage ion mirror 283
Supersonic expansions
Kinetic energy analysis in time of flight mass spectrometry: application of time of flight methods to clusters and pyrolysis studies in supersonic expansions 295

Thermally-labile molecules
Laser assisted reflectron time-of-flight mass spectrometry 1
Threshold photoelectron photoion coincidence
Kinetic energy analysis in time of flight mass spectrometry: application of time of flight methods to clusters and pyrolysis studies in supersonic expansions 295
Threshold photoelectron spectra
Kinetic energy analysis in time of flight mass spectrometry: application of time of flight methods to clusters and pyrolysis studies in supersonic expansions 295
Time of flight design
How to specify the ion optical system of a time-of-flight mass spectrometer 21
Time of flight mass spectrometer
Factors affecting the resolution in matrix-assisted laser desorption–ionization mass spectrometry 345

Van der Waals dimers
Resonance-enhanced two-photon ionization time-of-flight spectroscopy of cold perfluorinated polyethers and their external and internal van der Waals dimers 319
